Subject: MICROSOFT SETTLEMENT

I have found other companies, similar to Microsoft, to be as competitive as they. In fact, my new computer was installed with Netscape, which I did not want, and it crowded out everything else. Finally, I found a way to delete it

Microsoft has been innovative in a way which our country must encourage to stay ahead in this changing world. This litigation saps funds and restricts on-going research and development. Please, let this case be settled, so that Microsoft can get back to doing what they do best-creating, innovating, and enriching our lives. Sincerely, res@olypen.com
